

CURLINFO_SPEED_DOWNLOAD(3) curl_easy_getinfo options CURLINFO_SPEED_DOWNLOAD(3)

NAME

CURLINFO_SPEED_DOWNLOAD – get download speed

SYNOPSIS

```
#include <curl/curl.h>
```

```
CURLcode curl_easy_getinfo(CURL *handle, CURLINFO_SPEED_DOWNLOAD, double *speed);
```

DESCRIPTION

Pass a pointer to a double to receive the average download speed that curl measured for the complete download. Measured in bytes/second.

PROTOCOLS

EXAMPLE

TODO

AVAILABILITY

Added in 7.4.1

RETURN VALUE

Returns CURLE_OK if the option is supported, and CURLE_UNKNOWN_OPTION if not.
